

April 21, 2003

Ms. Genevieve Sparks
1148 Auburn Drive
Davis, CA 95616

Dear Genevieve:

Thank you for submitting the signed petition requesting speed humps on Auburn Drive, on April 21, 2003. Following is the procedure we will use to investigate your concern:

1. Enter service request into the system and schedule for speed and volume data collection.
2. Collect 48-hour speed and volume data.
3. Evaluate existing speed and other traffic criteria (crash history, etc.)
4. In the event the volume and speed data meet the minimum requirements for installation of speed humps, we will send out survey cards to the residents within the impacted area, inquiring support for installation of speed humps.

The placement of the data collection device has not been scheduled, but the process outlined above should take approximately 4 to 6 weeks.

Your Traffic Service Request log number is T2003-011. When inquiring on the progress of your request, please refer to this number.

If you have any questions or concerns, please call me at 757-5675 or e-mail me at mamazi@ci.davis.ca.us.

Sincerely,

Roxanne Namazi
