“This looks to be one of the best runs of Chinook in the Shasta in 10 years. What was just a mere 30 to 60 feet of suitable salmon habitat in 2008 has grown to more than 10 miles today.”

IN MT. SHASTA NEWS, OCTOBER 2011

“Years ago I'd ride my road bike around Shasta Valley; I'd watch these great big salmon sitting on redds, and that these fish had come so far and endured so much to end back where they started was pretty awe inspiring. Take up The Nature Conservancy on their offer.”
