

WEST SACRAMENTO'S

New Transit Center

Sample Transit Center, Union City, CA

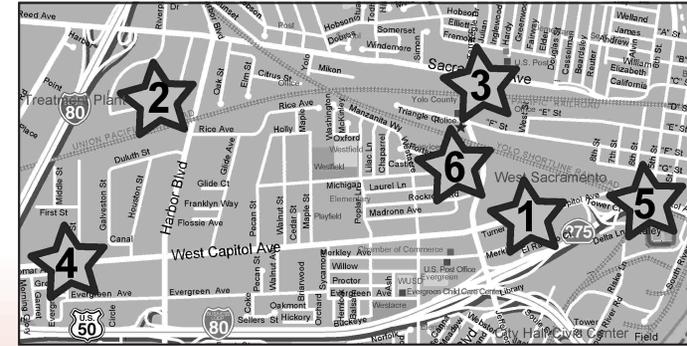

Project Background

The proposed West Sacramento Transit Center is a \$2.98 million planning, engineering, environmental, and construction project. The project is funded in part by two Federal Transit Administration (FTA) grants awarded to Yolo County Transportation District (YCTD) and managed by the City of West Sacramento. Approximately seven buses per hour will use the Transit Center, accommodating both fixed route and paratransit vehicles; a rail connection may be possible in the future.

Why is a Transit Center Needed?

Our community is transit dependent and we need to ensure our mobility options reflect our demand. This means that a transit center is essential for the City of West Sacramento. Transit centers provide an attractive central location or hub where passengers can transfer from one transit line to another, provide a safe boarding area, offer convenient access for riders to key destinations, and enhance community redevelopment with special paving and landscaping improvements. Modes of transportation that meet at transfer centers can include bus, rail, automobile, pedestrian, and bicycle. The West Sacramento Transit Center will:

- ◆ increase transit options and level of service
- ◆ preserve our options and viability for future light rail and regional rail modes
- ◆ ensure a variety of transportation choices
- ◆ serve the many transit riders in West Sacramento

Help Decide the Transit Center's Location

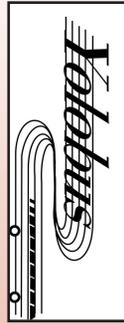

Six potential sites have been identified based on a combination of grant funding and site selection criteria; possible sites include:

- 1) West Capitol Avenue downtown at Merkley Avenue
- 2) Riverpoint Circle near Reed Avenue
- 3) Adjacent to UPRR at Jefferson Boulevard and Sacramento Avenue
- 4) West Capitol Avenue at Pine Street
- 5) West Capitol Avenue at 5th Street
- 6) Jefferson Boulevard at Michigan Boulevard

Help Design the New Transit Center!

Attendees will work in small groups. Each group, assisted by a transportation professional, will have the opportunity to make hands-on suggestions about location and design of the transit center, and to identify other community features that could be incorporated in to the project, such as landscaping, lighting, and architectural style.

West Sacramento Transit Center
1110 West Capitol Avenue

When is the Workshop?

This *one time only* workshop will take place Wednesday, August 25, 2004 at the City of West Sacramento Civic Center Galleria located at 1110 West Capitol Avenue, West Sacramento, 95691. Refreshments will be provided.

Workshop Agenda

5:30 p.m. to 6:00 p.m.
Open House

6:00 p.m. to 6:30 p.m.
Project Overview

6:30 p.m. to 8:00 p.m.
Interactive Workshop

Additional meetings are scheduled to provide you the opportunity to track this project through the preliminary engineering phase. Mark your calendars for September 14 and 16, and October 6, 2004. For more information, please call Kristy Day at (916) 448-2440, or email at kristy@thehoytco.com.

Who Should Attend?

The City of West Sacramento needs input from a wide range of participants as possible to ensure that the best, most practical decisions are made. Anyone who lives or works in West Sacramento will be interested in the development of the transit center. Therefore, *your input is valuable!*

For those unable to ride the fixed route service, Yolobus will be available after the workshop and arrangements for your return trip may be made upon your arrival.
